Subject: California Injection Wells

Andre:

Your question (shown below) came to my inbox as I am the Grants Project Officer for the Underground Injection Control (UIC) Program for California. For the injection wells that are permitted and overseen by USEPA in California (Class I and Class III), there is a public participation and public disclosure process built into the Federal UIC Regulations (40 CFR 144.31 - Application for a permit; authorization by permit). Public participation and disclosure occurs during the permitting phase for these wells.

The State of California has Primacy for Class II injection wells in the state, which includes enhanced oil and gas recovery and disposal wells.

You can contact them directly for information on their State Regulations and Processes in so far as public participation and disclosure is concerned.

Their website is: <http://www.conservation.ca.gov/dog/Pages/Index.aspx>

A contact person there is:

Jerry Salera

Underground Injection Control (UIC) Program

CA Division of Oil, Gas and Geothermal Resources

801 K Street, MS 18-05

Comments: I recently received some information on injection wells within California and was wondering what, if any, level of reporting to the public as far as location of these well and purpose or use of well, is required by companies to disclose that use injection wells? Thank you
